Lesson 3 APP Customization

1. Project Outcome

Execute the action group in the folder "Lesson 2 Action Programming" through mobile APP custom function.
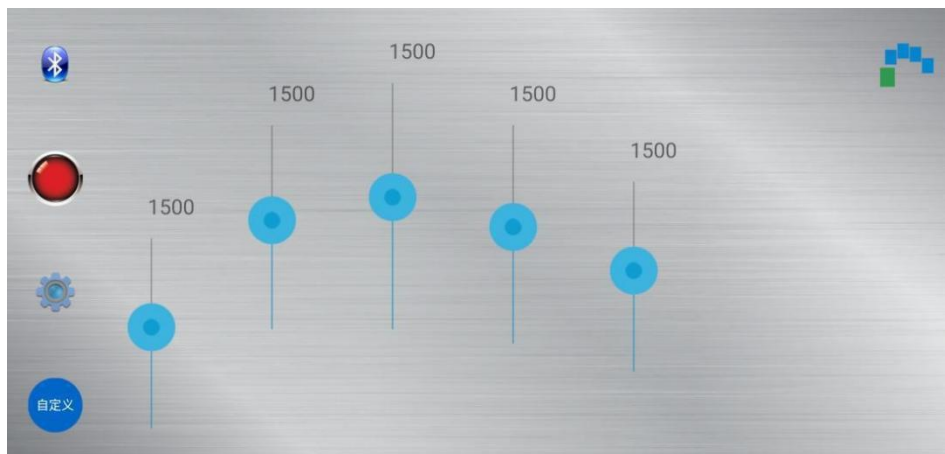

2. Complete Program

2.1 Preparation

1) Confirm that Bluetooth and GPS service have been enabled.

2) Confirm that No.20 action group has been successfully downloaded into uHand2.0.

　　(Software will prompt after downloading)

2.2 Operation Steps

Step 1: switch on the robot and then open mobile APP "uHand".

Step 2: Connect device according to the tutorial in folder "2. Remote Control" -> "Lesson 2 Mobile Control"
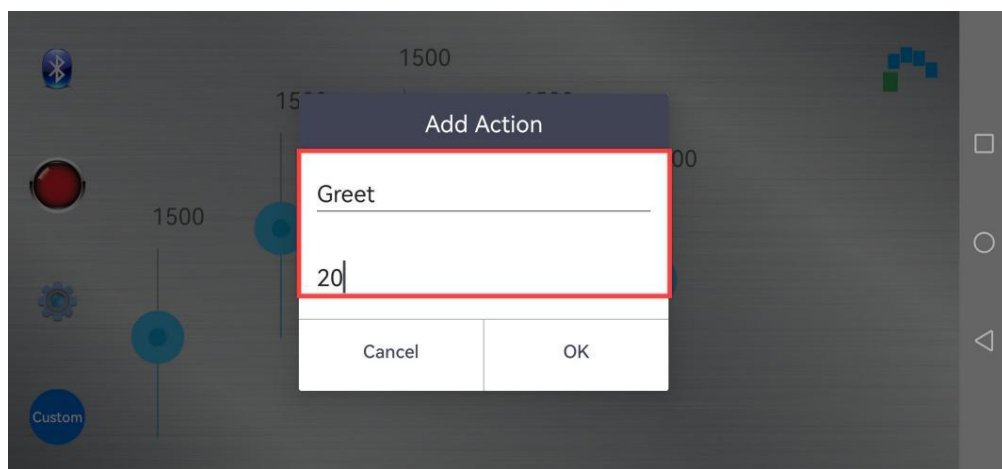

Step 3: Click "customize" button in the home interface. Then click "add" in the pops-up interface.

Step 4: Enter the action group name and action group number in the pops-up interface.

The action group name can be entered arbitrarily but the action group number must be entered correctly, otherwise it can not be executed.

Step 5: After adding the action, click the action group name to execute the corresponding action once.

Step 6: If want to delete, drag or long press the action group name and then click "delete".
